Motivation

1. Creating a social media website with personalized user profiles and content recommendations
2. To create a social Media website with maximum of the features available.
3. Promoting Connection and Community
4. Sharing our thoughts, ideas as posts and interaction with one another

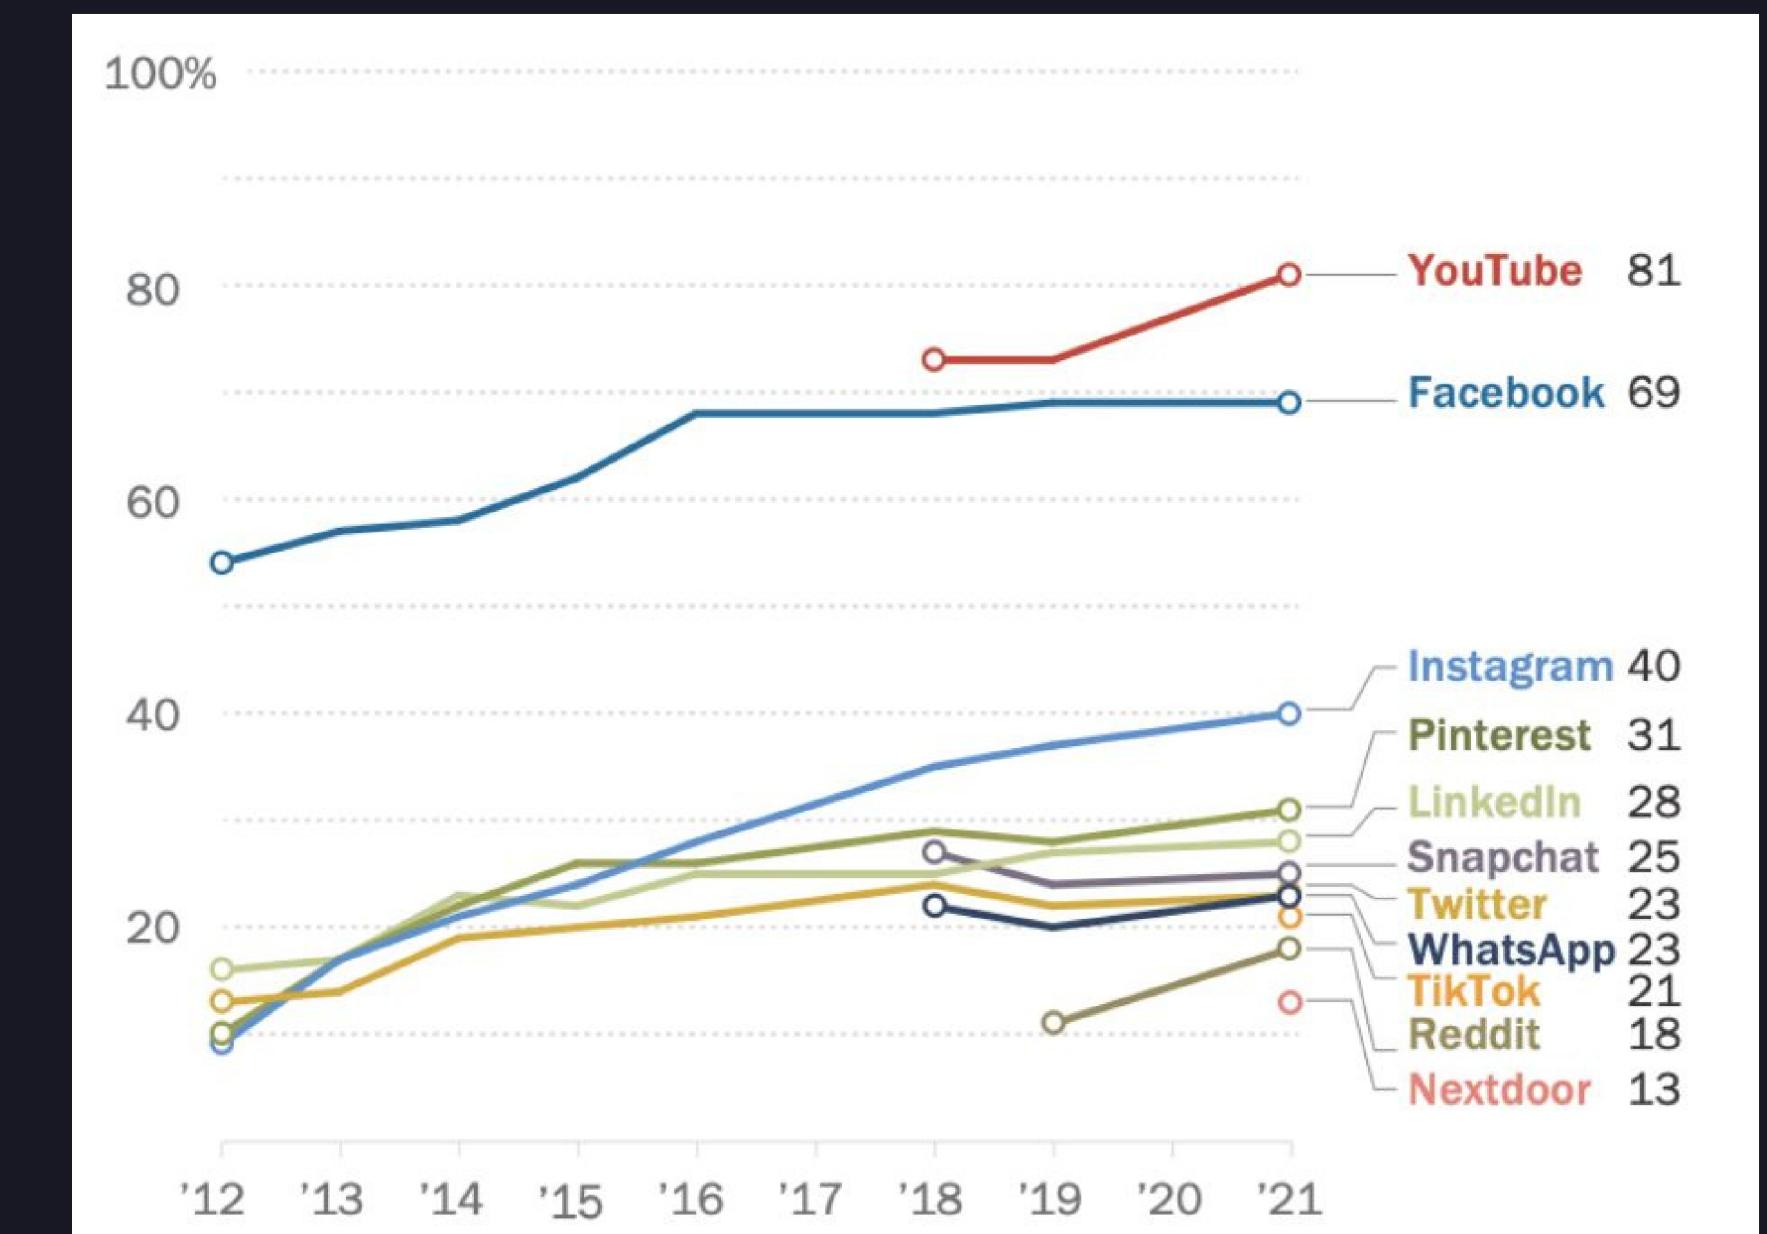

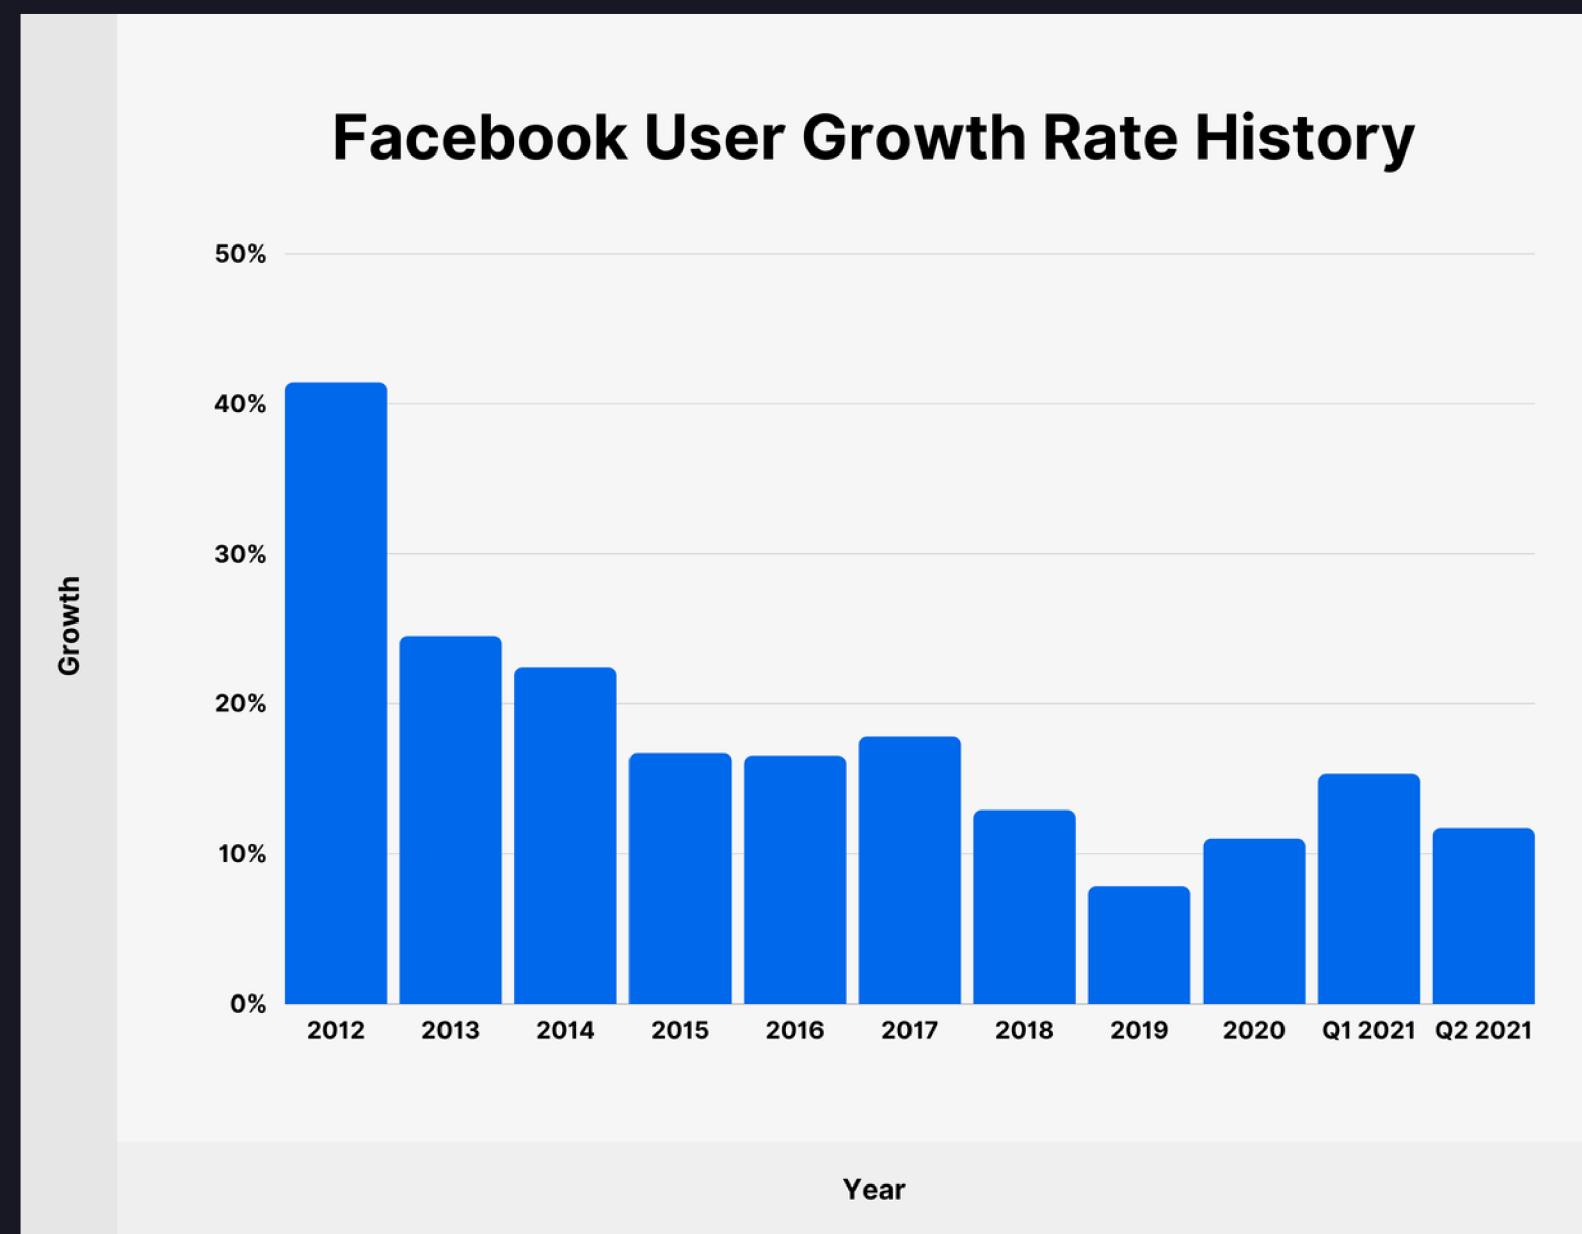

STAGES OF DEVELOPMENT

- 1 Requirement Analysis
- 2 Prototype Making
- 3 Learning
- 4 Development

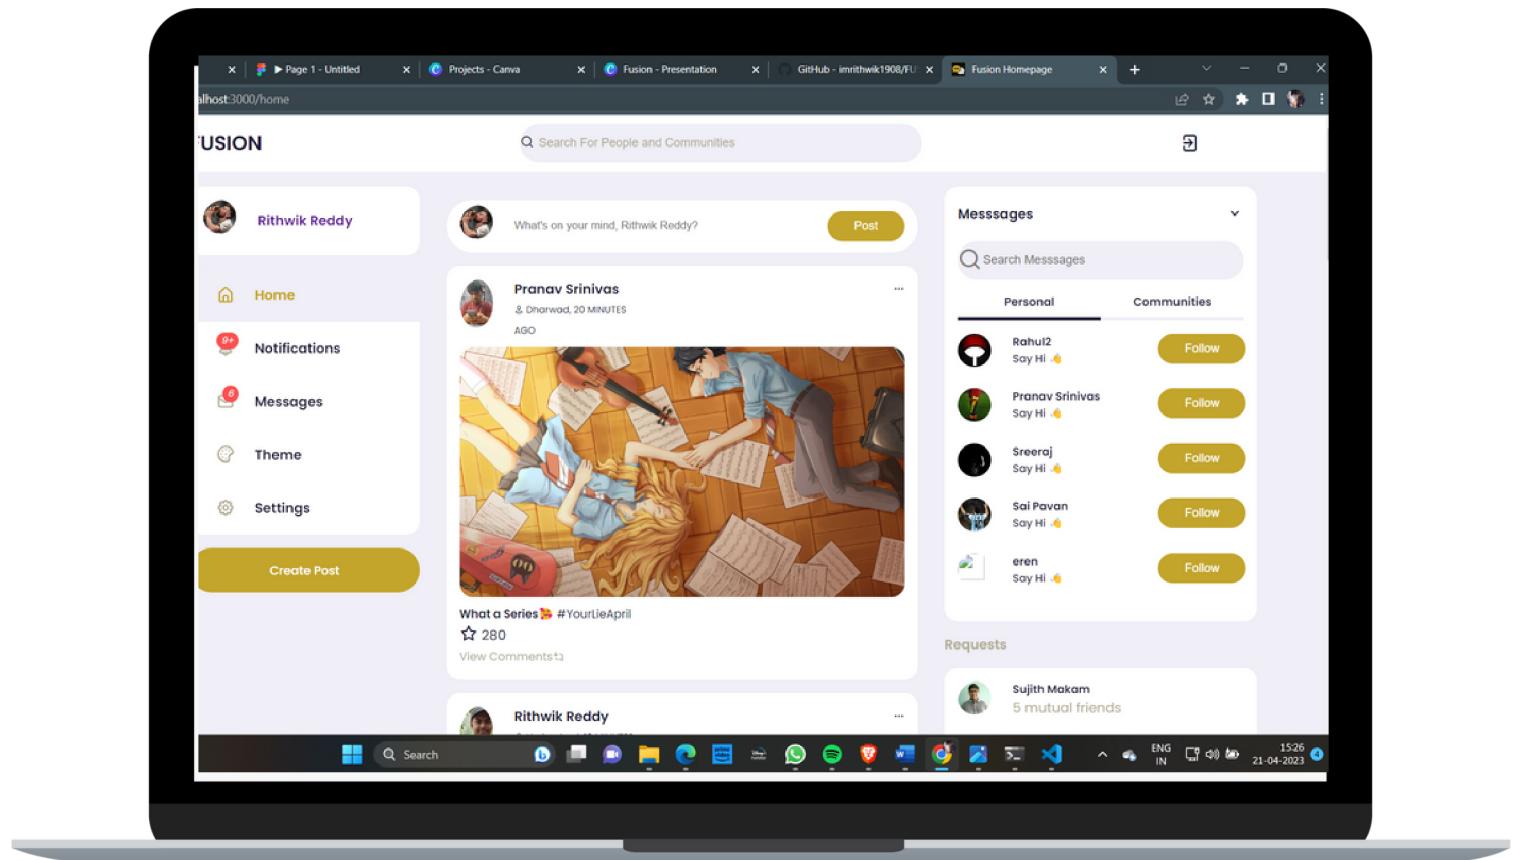

REQUIREMENT ANALYSIS

Analyzing existing social media platforms

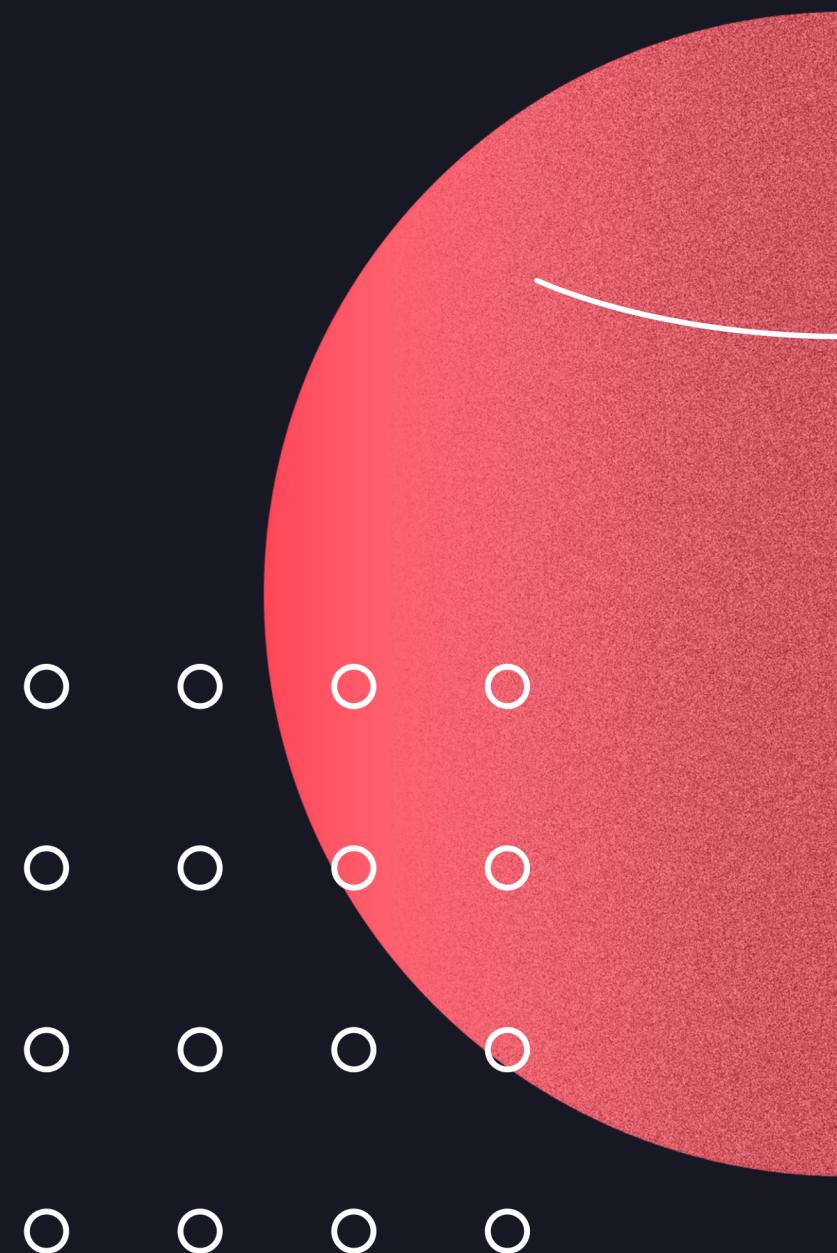

PROTOTYPE MAKING

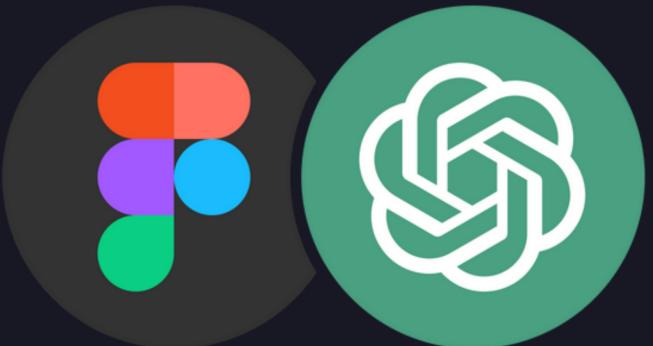

Prototyping is crucial in our social media platform's development, and we aim to make the GUI as interactive as possible. We've created various color palettes, styles, and other elements to ensure the platform looks exactly how we envisioned it. This approach has simplified the frontend development process.

Tech Stacks Used

mongoDB

DEVELOPMENT STAGE:

Developing the website's structure:
This involves creating the basic structure of the website, including the homepage, user profile pages, and other key pages and sections like chats and posts.

FEATURES THAT SET US APART

From Other Applications

1 Personalized user interfaces.
Customizable themes with light, dim, and dark modes make our website highly interactive.

2 Community Rooms
Chat Rooms that we can create and add users and can set users limit.

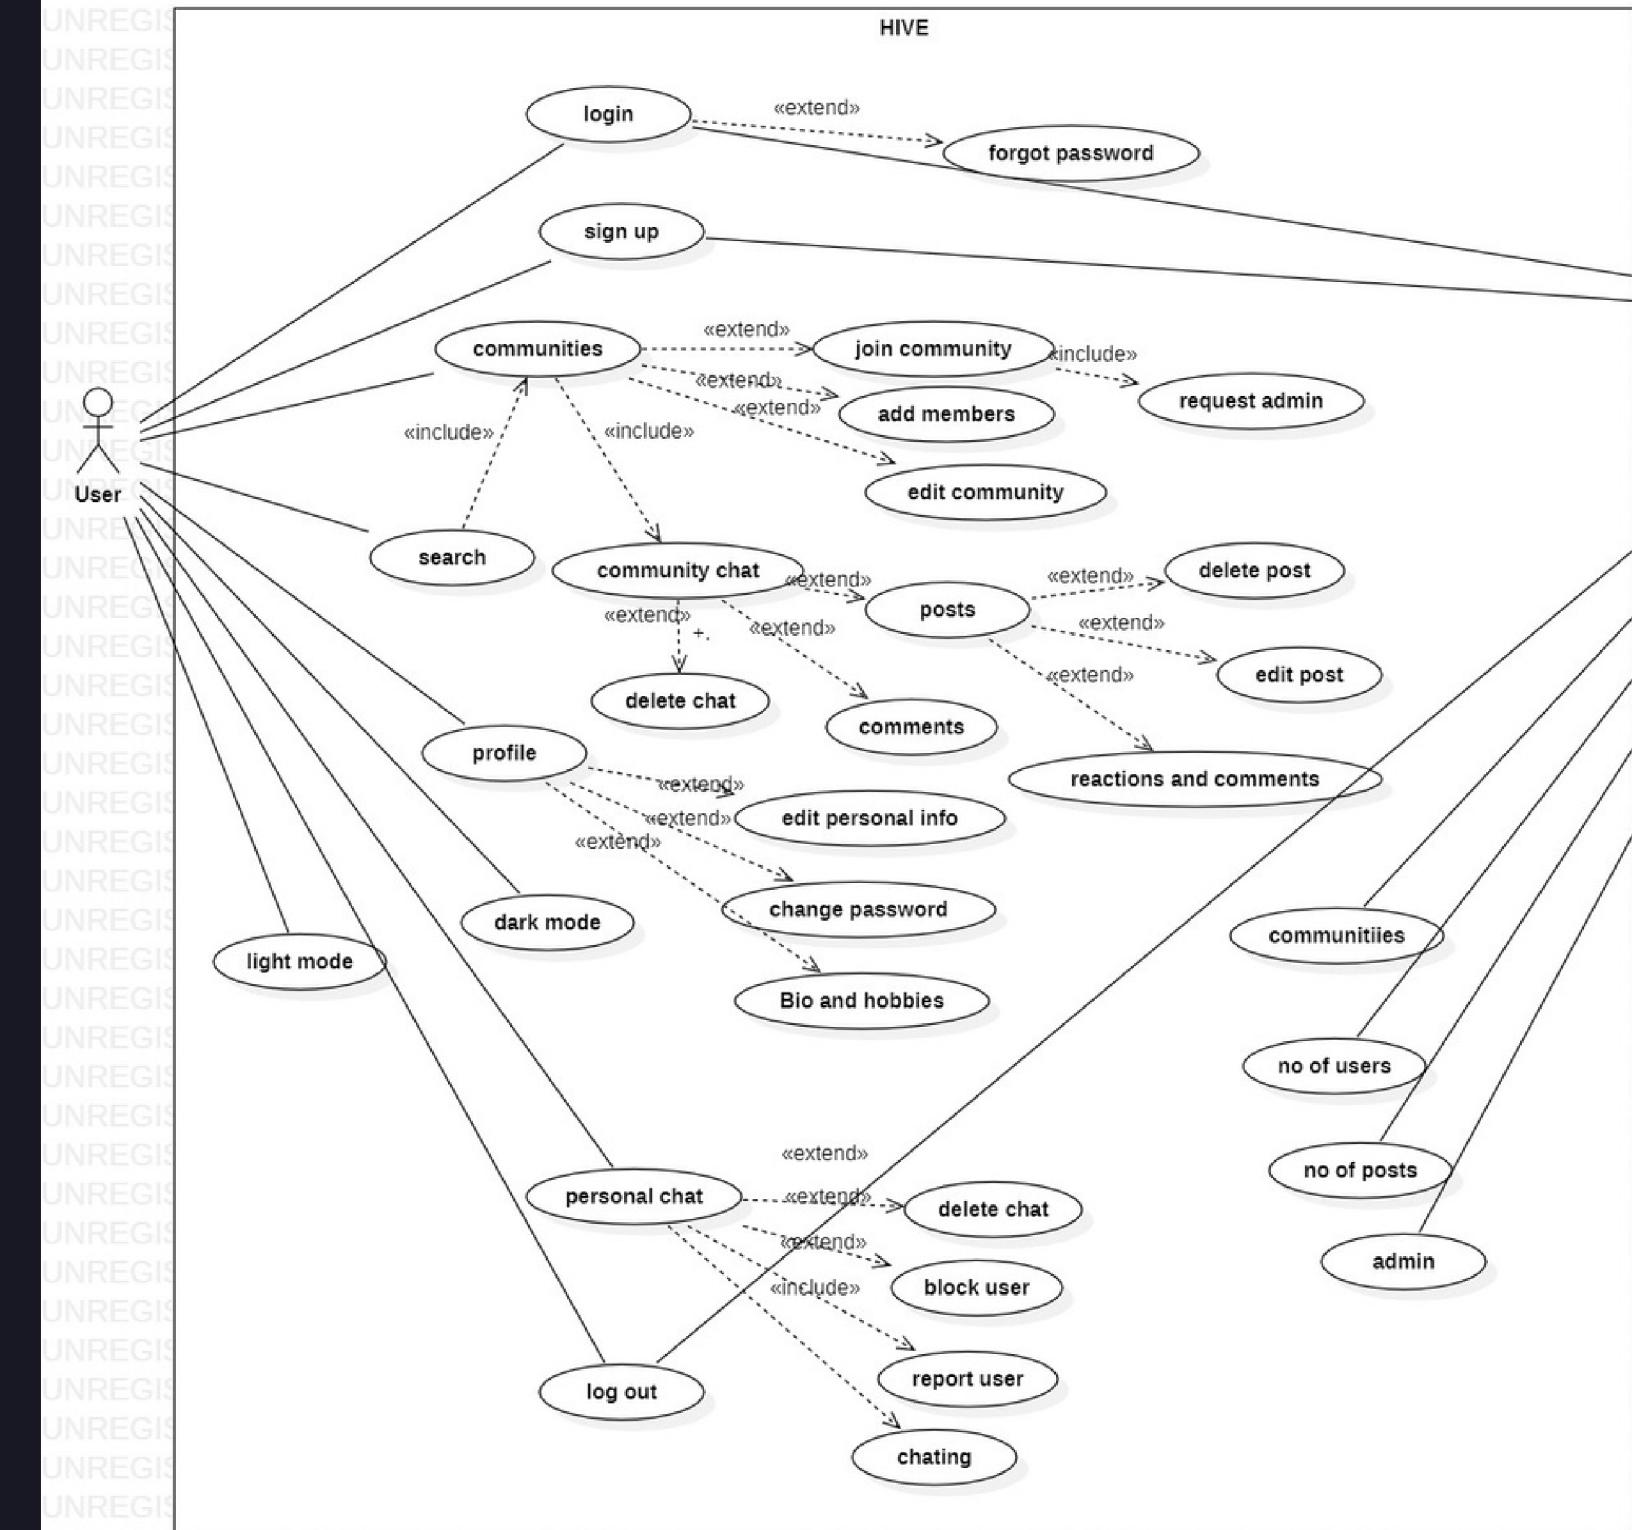

3 Post And Message Scheduling
With this upcoming feature, users can schedule posts and messages, enabling them to maintain a consistent posting schedule and reach their audience at the optimal times.

4 Our AI Bot (EmoMate)
We're planning an AI that can chat with users, solve website queries, give suggestions on how to start conversations,
